COMMENTS

Adult occupant: Frontal impact: The protection offered to the driver and passenger head and neck was good. Driver chest got weak protection and adequate for the passenger's chest. Both occupants' knees received marginal protection as they were exposed to injuries risks when impacting in dangerous structures behind the dashboard and facia. Driver and passenger tibias received adequate protection. Footwell area was rated as unstable. The bodyshell was rated as stable and could withstand further loadings. Side impact: The head received good protection; pelvis received adequate protection, abdomen marginal protection and the chest weak protection. The car does not offer ESC as standard. Considering all the above the Onix as from VIN 9BGKS48U0JG313644 (production from January 15 2018) reached three stars for adult occupant protection.

COMMENTS

Child occupant: The child seat for the 3 year old child was installed forward facing using the ISOFIX anchorages and the top tether and was able to prevent forward movement during the frontal impact beyond the excursion limits and offered marginal protection to the dummy. The Q1.5 was installed rearward facing using the ISOFIX anchorages and support leg and offered good protection during the frontal impact. Side impact: both child dummies were well protected in the side impact. All of the CRSs pass the installation test. ISOFIX marking does not meet Latin NCAP requirements. The car does not offer passenger airbag disabling switch. The car does not offer 3 point belts in all seating position. The car offers ISOFIX and top tether anchorages as standard in both rear outboard seating positions. Considering all the above the Onix as from VIN 9BGKS48U0JG313644 (production from January 15 2018) reached three stars for child occupant protection.
