Front seatbelt pretensioners	<b>NO</b>	Driver knee airbag	<b>NO</b>
Driver frontal airbag	<b>NO</b>		
Front passenger frontal airbag	<b>NO</b>		
Side body airbags	<b>NO</b>		
Side head airbags	<b>NO</b>		

## COMMENTS

**Adult Occupant:** The rating for the Chevrolet Celta was limited to 1 star due to the unacceptably high risk of life threatening injury to the driver's head. The protection offered to the driver's chest was weak and there were hazardous structures in the area of the fascia that could be impacted by an occupant's knees. Pedal intrusion and footwell rupture are high risk of severe injury to the driver lower leg and foot. The bodyshell was not capable of withstanding further loading.

**Child Occupant:** The dynamic performance of the child restraints was adequate. However, the installation instructions on both child seats were insufficient and not permanently attached to the seat. The recommended child seats was found to be incompatible with the belt system on the vehicle

(\*) Side impact test under UNECE95 and passing the test is required for the 5 stars. OEMs can request the mentioned test voluntarily and its result to be published along with the other results of the model. For Latin NCAP, certain level of safety provided by a car, is considered only when it has been demonstrated in a crash test.
