CAR DETAILS

Model tested: Renault Fluence 1.6, LHD

Year of publication: 2012

Body type: 4 door Sedan

Crash test weight: 1512 kg

SAFETY EQUIPMENT

Front seatbelt pretensioners	NO	Driver knee airbag	NO
Driver frontal airbag	YES		
Front passenger frontal airbag	YES		
Side body airbags	NO		
Side head airbags	NO		

COMMENTS

Adult occupant: In the frontal impact the driver and passenger heads were both well protected by the restraint systems. Both seatbelts were not equipped with pretensioners. There were hazardous structures in the area of the fascia that could be impacted by an occupant's knees. The passenger chest was marginally protected by the restraint systems.

Child occupant: The child seat for the 1,5 and the 3 year old child was able to prevent excessive forward movement during the impact. The installation instructions on both child seats were insufficient and not permanently attached to the seat. The vehicle did not give any warnings as to the hazards associated with installing a rearward facing child seat on the front passenger seat with an active airbag.

(*) Side impact test under UNECE95 and passing the test is required for the 5 stars. OEMs can request the mentioned test voluntarily and its result to be published along with the other results of the model. For Latin NCAP, certain level of safety provided by a car, is considered only when it has been demonstrated in a crash test.
