CAR DETAILS

Tested model: VW JETTA / VENTO, LHD

Year of publication: 2013

Body type: 4 door Sedan

Crash test weight: 1526 kg

SAFETY EQUIPMENT

Front seatbelt pretensioners	YES	Driver knee airbag	NO
Driver frontal airbag	YES	Seatbelt Reminder System	YES
Front passenger frontal airbag	YES	ABS	YES
Side body airbags	NO	ISOFIX	YES
Side head airbags	NO		

## COMMENTS

**Adult occupant:** In the frontal impact the head and neck of the driver and passenger were well protected. The driver's and passenger's chest showed adequate protection from the restraint systems. The driver and passenger's knees readings remained in an acceptable level and it was demonstrated that these parts offers a similar level of protection to occupants of different sizes or those sat in different positions. The footwell area remained nearly undeformed after the impact. The bodyshell was rated as stable and was capable of withstanding further loading.

**Child occupant:** The Isofix child seat for the 3 year old child and the 11/2 year old child were able to prevent excessive forward movement during the impact and protected both child well. The installation instructions on both child seats were sufficient and permanently attached to the seat. The car did give warnings as to the hazards associated with installing a rearward facing child seat on the front passenger seat with an active airbag but its marking is not enough to meet Latin NCAP criteria.

(\*) Side impact test under UNECE95 and passing the test is required for the 5 stars. OEMs can request the mentioned test voluntarily and its result to be published along with the other results of the model. For Latin NCAP, certain level of safety provided by a car, is considered only when it has been demonstrated in a crash test.
